

# Understanding & Implementing Design for Safety (DfS) 7<sup>th</sup> run (Virtual Classroom)

**\*\* Supported by UTAP**

## Introduction

Design risk can be managed effectively by identifying the hazard and controlling the risk through Design for Safety (DfS) reviews during project development. Designing for safety should start at the early stage of a project whereby key stakeholders will review the design progressively to identify hazards on the building layout, materials used and construction methods etc. so as to enhance the safety of the project for construction as well as operation and maintenance.

IES Academy Virtual

## Objectives

This course will highlight the benefits of DfS to encourage its adoption for all construction or retrofitting projects. It will also equip participants with the basic knowledge of DfS so that they can implement DfS while the design is in development.

## Pre-requisites

Prior to attending this course, you should:

- Have a PC / laptop / tablet / smart phone with built-in or external webcam.
- Installed the zoom client.
- Have Wi-Fi / high speed internet connection available.
- Receive an email with a link for you to submit a registration for webinar 1 week prior to the commencement.
- Receive an email with a link and password for you to join the webinar session after your registration is successful.

## Course Outline

- Understanding Design for Safety (DfS)
- Implementing DfS review process during project development
- Implementing DfS at design phase
  - o Risk/Hazard identification techniques
  - o Risk evaluation based on severity & likelihood
  - o Risk mitigation based on hierarchy of control
- Good practices & examples of DfS application
- Guidelines for documentation of DfS process
- Factors for successful implementation of DfS

## **Trainers' Profile**

**Er. Ng Lee Chian**

Ng Lee Chian is a Professional Engineer in the field of Civil Engineering. She has designed, supervised and managed many buildings such as MFA building & ICA Building; and infrastructures such as Changi Water Reclamation Plant, Sungei Sembawang Abstraction Pond & CTE/Braddell Road Interchange in Singapore. Her involvement in a wide range of projects has given her extensive knowledge on different areas of engineering skills.

She is currently a practicing DfS Professional for numerous diverse and challenging projects such as medical centres, multi-storey integrated complex, educational institutions, addition & alteration to existing high-rise buildings, and infrastructures such as roadworks & tunnels.

Lee Chian is a member of IES Health & Safety Engineering Technical Committee (HSETC). She is actively promoting 'Design for Safety' through regular DfS trainings and has also presented in the Design for Safety Seminar and BCAA-IOSH WSH Conference.
