

Design for Safety in Construction 13th run

(Virtual Classroom)

**** Supported by UTAP**

Introduction

The regulatory requirement for Design-for-Safety (DfS) was enforced since August 2016. It requires stakeholders to work together to address foreseeable risks right from the conceptual design to the construction of the project. During the construction stage, the DfS review meetings will involve the design & supervision team from the Consultants and construction team from the Contractor. They will participate in reviewing safety and health risks relating to design and propose mitigation measures for implementation.

IES Academy Virtual Classroom

Objectives

1. To know the duties of key stakeholders in the WSH (DfS) Regulations.
2. To understand the DfS review process called GUIDE, in particular the GUIDE 3 review which is convened during construction stage.
3. To differentiate between Construction Risk Assessment Form that are submitted by the Contractor and the Safety & Health Risk Assessment Form/ Design Risk Records prepared during the DfS review process.
4. To enhance construction safety by implementing the control measures identified during the DfS review meetings.
