

Standards Development Training – 2nd Run (3-Day Course)

Enterprise
Singapore

Introduction

Standardisation is a pillar of the technical infrastructure necessary in any technology-driven economy. A well-conceived standardisation programme serves as the foundation for growth of emerging areas and export-oriented industries and provides a mechanism to improve productivity and quality. It also provides the basis for ensuring safety and health as well as for protecting the environment. Standards development projects are undertaken on a need basis and for the purpose of promoting innovation, security, safety, productivity, quality and efficiency of products, services, systems and processes.

The Singapore Standards Council (SSC) facilitates the development, and promotion of Singapore Standards, Technical References and Workshop Agreements in Singapore. This work is done through partnerships with the industry, academia and government organisations, under the Council overseen by Enterprise Singapore.

IES Academy, in collaboration with EnterpriseSG, has developed this 3-day training programme on standards development to equip Standards Partners, Secretariats, Committee Chairs, Convenors and key stakeholders with the necessary knowledge and skillsets so as to support and administer the development of national and international standards.

Objectives

- Gain insight into the Quality & Standards Ecosystem
- Learn about the Singapore Standardisation Programme
- Understand the standards development process
- Learn how to manage standards development projects
- Acquire knowledge and skills on the publication of standards

Profiles of Trainers

Mr Peter Leong, a Practising Professional Engineer, has more than 35 years experience in Standardisation and Conformity Assessment work. He was member of several standards working groups, chaired the Electrical AND Electronics Standards Committee for 6 years and is currently President of Singapore National Committee of International Electrotechnical Commission (IEC). On conformity assessment, he was instrumental in setting up the environmental, fire, electromagnetic compatibility, acoustic and electronics test laboratories in Singapore. Under his leadership Singapore was first ASEAN country to join the IECEE- CB scheme in the early 1990s.

Mr Koh Lian Chong has over 40 years of extensive experience in software development, project management and operations management in the information technology and media industry. In the past 8 years, he was heavily involved in local and international ICT standards development in different capacities where he had performed various roles such as member, convenor and secretariat of different working groups. Additionally, he is also an ACTA-certified adult educator.
