Developers/Contractors

Dear Sir/Madam

**CLEAR WATER DURING NATIONAL DAY PARADE (NDP) 2021**

This year, the National Day Parade will be held at the floating platform at Marina Reservoir where people can enjoy a 'live' streaming of the parade with the city skyline and clear water serving as a spectacular backdrop. As such, it is important that the Marina Reservoir continue to look aesthetically pleasing during these events.

2 To ensure clear and clean water in the Marina Reservoir during the NDP, we would appreciate it if you could manage your project team to operate and maintain your Earth Control Measures (ECM) properly at your construction sites, and take all possible steps to prevent silty water discharge from your construction site during the event. We would like to remind you to ensure that your construction site(s) observe the following good ECM practices:

- a) Cover exposed bare area with proper materials before rain and after works.
- b) Check and maintain the treatment plant to ensure it is in good working conditions at all time.
- c) Treat and empty the silty water in the holding pond and get ready for next rain event.
- d) Monitor the quality of treated water discharging into public drain during treatment process.

Our officers will continue to monitor the Marina Reservoir catchment closely and carry out inspections where necessary to ensure compliance of ECM by construction sites.

3 We hope that you will continue to give your fullest support to showcase a clean and beautiful Marina Reservoir during the NDP 2021. For any clarification, please feel free to contact Mr Goh Hearn at [goh\\_hearn@pub.gov.sg](mailto:goh_hearn@pub.gov.sg) or 92334349

4 More information on our ECM programme is available at PUB website: <https://www.pub.gov.sg/drainage/earthcontrolmeasures>.

Thank you

Yours faithfully,

Si Soon Beng  
Principal Engineer  
Catchment & Waterways Department  
PUB, Singapore's National Water Agency
