

Our Ref: PUB/CWD/RU/NDP-2022

Date: 4 JUL 2022

Dear Sir/Madam

CLEAR WATER DURING THE NATIONAL DAY PARADE (NDP) 2022

This year, the National Day Parade (NDP) will be held at the floating platform at Marina Reservoir where people will enjoy a 'live' streaming of the parade with the city skyline and clear water serving as a spectacular backdrop. As such, it is important that the Marina Reservoir continues to be aesthetic pleasing during the NDP event.

2 To ensure clear and clean water in Marina Reservoir, we would appreciate that if you could manage your project team to operate and maintain your Earth Control Measures (ECM) properly and take all possible steps to prevent silty water discharge from your construction sites. We would like to remind you to ensure that your construction sites observe the following good ECM practices:

- a) Cover exposed bare areas with proper materials before the rain and after work.
- b) Check and maintain the treatment plant to ensure it is in good working condition at all times.
- c) Treat and empty the silty water in the holding pond and get ready for the next rain event.
- d) Monitor the quality of treated water discharging into public drains during the treatment process.

3 PUB officers will continue to monitor and inspect the Marina Reservoir Catchment closely to ensure compliance of ECM by construction sites.

4 We hope that you will continue to give us your fullest support to showcase a clean and beautiful Marina Reservoir during the NDP 2022. For any clarification, please do not hesitate to contact our officers Ms Rosyahti at Rosyahti_MAULOT@pub.gov.sg or [68852488](tel:68852488), or Mr Ng Yu Yee at Ng_Yu_Yee@pub.gov.sg.

5 More information on our ECM programme is available at PUB website: <https://www.pub.gov.sg/drainage/earthcontrolmeasures>.

Yours faithfully

Lee Cai Jie
Chief Engineer
Catchment & Waterways Department
PUB, Singapore's National Water Agency
